INSTRUCTION FOR USE
Dental product
for temporary tooth filling
“TEMPODENT”

INDICATIONS
The scope of use is dentistry. Professional use in the healthcare facility.
Dental material TEMPODENT is used as temporary tooth filling material in covering of the drug preparation in the dental cavity during the treatment of the deep caries.

SPECIAL PRECAUTIONS
Drug idiosyncrasy.
Use with great care for allergic patient.
Don't misuse.

POSSIBLE ADVERSE EFFECTS
If the conditions of storing, transporting and following the instructions are satisfied, there are no adverse effects.

COMPOSITION AND CLINICAL PHARMACOLOGY
Dental material TEMPODENT is produced as:
- the powder with the mixing water content;
- the paste hardening at the influence of the mouth cavity moisture.
The base of the material is composed of zinc oxide, zinc sulfate, modifiers and processing additives. The diluting of the powder with the distilled water results in forming of plastic mixture. After hardening the temporary filling isolates the tooth cavity.
Dental material is produced for using in aggressive biological matrix with the temperature range between 32°C and 42°C (in the mouth cavity at the temperature (37±1)°C and humidity 60-90 %).

METHODS OF ADMINISTRATION
The powder of the dental material TEMPODENT is stirred with the distilled water on the glass plate during 1 minute for receiving plastic mixture. This paste is inserted as 1 portion into the formed tooth cavity covering the drug preparation. The filling hardens within 10 minutes. During the time of hardening the must be isolated from saliva.
In pediatric dentistry it is recommended to use the paste of more soupy consistency in order not to traumatize a child during removing of the material out of the cavity with the dental drilling machine.
The ready-made paste is used in small portions helping to make forms with the instrument. This material hardens under the influence of the saliva during 30 minutes.
Close the materials tightly after use.

PRESENTATION FORM
Powder (jar) 80 g or 200 g
Paste (jar) 50 g
Instruction for use 1 piece
The material can be produced as separate items.

STORAGE
Store at a temperature of 5°C to 25°C.
Tightly close container immediately after use.
Do not use after expiry date.
Shelf life: 3 years from date of manufacture.
